OUR INFORMATION SECURITY POLICY

Asen Aluminum Industry and Trade Inc. Management; accepts corporate information as an extremely valuable asset and acts with the principle of "**Information Protection**" in its activities . It aims to establish and operate the ISO/IEC 27001 Information Security Management System Standard and to continuously improve it in line with the objectives.

To ensure this;

- To value and protect information,
- To fulfill the information security obligations arising from the legal regulations or contracts related to our activities,
- To protect the confidentiality, integrity and accessibility of our information assets,
- To detect uncontrolled and unauthorized access to our information and information assets, to intervene, record and prevent them as soon as possible,
- To raise awareness of employees and third parties about information security, to increase their awareness to protect their own and their stakeholders' information,
- To ensure that the basic and supportive business activities of our institution continue with the least interruption,
- To ensure that information is secured by effectively managing information security risks,
- To determine information security roles and responsibilities, to provide the necessary resources,

undertakes.

In order for the activities carried out within the scope of information security to achieve the targeted success, users (institution employees, suppliers, guests, etc.) It is essential that it takes a conscious approach to the issue and fulfills the duties within its areas of responsibility, and pays maximum attention to the published policies, procedures, guidelines and announcements.
